Dear,

I am excited to apply for the Software Engineer position at your company. As a System Test Engineer with 2.5+ years of experience in automotive industry where I worked with AUTOSAR architecture, UDS Protocol, requirements coverage, Test Automatization, programming in Embedded C language, developing GUI applications for customers, CAN/LIN Protocols, DOORS DXL, hardware and many more, I am confident that I have the skills and experience necessary for this position.

My objective is to develop my technical skills in the field of computer science, from web development where I worked with AngularJS, Flask, Django, Laravel to application development where I worked with .NET WPF, PyQt5, and many more. Also, I have experience with databases (SQL), cloud computing, and networking protocols (TCP, UDP, IP)

Interested in fields of Artificial Intelligence, Machine learning, Smart Grid. Docker and Big Data which I am currently studying in my master's program.

Always trying to learn new things to improve my skills and knowledge. Open-minded and very communicative person.

Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further, and learn more about the exciting opportunities at your company.

Sincerely,

Nikola Miljković
